

NEWS RELEASE - FOR IMMEDIATE RELEASE

EMC PRECISION ACQUIRES BIDDLE PRECISION COMPONENTS *85 Year Old Family-Owned Precision Machining Firm Doubles in Size*

ELYRIA, OHIO, March 24, 2010 - EMC Precision Machining, a fourth-generation, family-owned company that produces complex precision metal components for a diverse group of global customers, today announced a definitive agreement to acquire Biddle Precision Components of Sheridan, Indiana.

Biddle Precision Components is also a fourth generation family-owned precision machining company. Its complementary machining technologies and capabilities will effectively double the size of EMC and give the firm a broader array of processes and skill sets to meet customer needs.

"Through the acquisition of Biddle Precision Components, we reinforce EMC Precision Machining's ability to rapidly respond to customers' precision machining problems", said Brad Ohlemacher, president of EMC. "We are absolutely dedicated to our core strength of serving customers who need precision machined solutions in a short amount of time."

EMC chief executive officer Jeff Ohlemacher added, "We will quickly leverage the synergies between EMC Precision and Biddle to build on our strong market position. We have, and will continue to invest in processes, capacity, technology, and training to ensure that we remain strong as the economy begins to recover.

About EMC Precision Machining

EMC Precision Machining produces high complexity, close tolerance precision machined parts and assemblies. A time-tested company, customers rely on EMC Precision Machining for the full range of close-tolerance turning, milling and grinding operations for metal and plastic components, from one prototype to tens of thousands. EMC engineers, prototypes, finish, assemble, packages, and manage part inventories to customer specs.

As a family-operated company since 1925, EMC honors the principles behind four generations of success, pursued with a steady eye on the future. Continuous investments in advanced equipment, processes, engineering, training and team building ensure that custom products are delivered on time, defect-free, at the total lowest cost, with excellent customer satisfaction.

When you absolutely need it done right and you need it right now.
